## **U-RO Border Humanitarian Relief Project – 2022**

Ukraine-Romania Border Project for War Refugees

The Barsan Foundation launched the U-RO project in response to the immediate challenge of improving the well-being of refugees fleeing war zones in Ukraine. Our objective is to help women and children who are displaced within Ukraine or in temporary shelters in Romania. Like our annual winter giving project, our team prepares boxes of essential supplies for direct delivery to refugees. With recommendations from local relief authorities, these are being distributed at neighborhood distribution sites, inside designated shelters, and to private homes that have accepted refugee families. Supplies address very basic necessities for mothers and children, including water, potatoes, bread and basic hygiene resources.

The Barsan Foundation partners with the Petras Fundacia in Sibiu, Romania for the purchasing and packaging of items into prepared boxes. With their volunteers and local public agencies, the Petras Foundation staff transport and deliver supplies where they are most needed.

**Our GOAL is to raise \$50,000** with funds allocated per below.

\$35,000 – bottled drinking water and food

\$10,000 – infant and toddler items such as diapers, baby formula, small toys

\$5,000 – fuel and stipends for staff/volunteer travel to delivery sites

Funds are being wired from the Barsan Foundation account to the Petras Foundation on a weekly basis to ensure speedy purchasing, packaging and delivery of humanitarian packages. Donations will be directed toward this project through May 2022 at which time it will be decided whether to continue this initiative or resume our planned summer camp and school bag projects.
